SkinCeuticals goal is to provide you with advanced skincare backed by scientific evidence.

When it comes to the scientific proof behind skincare technology, SkinCeuticals sets the standard in the cosmeceutical industry. They devote countless resources toward research at major medical institutions to support the technology behind their products. Their active ingredients are pharmaceutical grade, and the studies performed on their core products are peer reviewed.

Over time, regardless of lifestyle, skin begins to change. Signs of aging may appear. Fine lines, wrinkles, discoloration, and loss of elasticity become more visible. These signs can be the result of collagen breakdown, slower cell-turnover, and loss of moisture. Damage is intensified by sun exposure, environmental assaults, and smoking. SkinCeuticals Corrective Products combine reparative, lightening, and exfoliating ingredients to help rehabilitate the skin, restoring a healthier and more youthful appearance. The category includes products formulated specifically for delicate areas such as the eyes and lips.
