MARCH 2008

Skincare research shows that aging skin is the result of more than just years on the calendar. Exposure to environmental elements like sunlight, smoke, and air pollution causes photoaging in skin. Not only does this lead to the formation of lines, wrinkles, and pigmentation - it can lead to more serious skin conditions, including skin cancer.

A comprehensive antioxidant program can help prevent photoaging and the onset of more serious skin conditions. Topical antioxidants have now been shown to provide up to eight times the skin's natural protection from UV damage. Sunscreens are also an important part of the prevention process, although they cannot do it alone.

Antioxidants protect your skin from the sun in ways that sunscreens can't. When used together, antioxidants and sunscreens provide almost complete photoprotection - preventing photoaging, preventing the appearance of fine lines and wrinkles, and promoting good skin health.

SkinCeuticals has developed a full menu of super-antioxidant formulas for all skin types - designed to provide the most advanced protection from environmental aging.

## Jessner's Chemical Peel

Produce beautiful results with greater exfoliation. The Jessner's peel is excellent for all skin types. It smoothes and rejuvenates skin, producing beautiful results in treating mild to severe acne, discoloration, moderate wrinkling, and sun damage. Peeling the face, neck, hands, and upper chest is also quite effective.

**Who is the Jessner's Peel for?** The Jessner's peel combines resorcinol, lactic acid, and salicylic acid to result in deeper penetration and greater exfoliation of the outer layers of skin cells. This deeper exfoliation produces noticeable flaking and exfoliation in the following three to four days after the peel, and within a week a smoother, healthier layer of skin will be revealed.

## NuPeel Exfoliating Gel 15% off

This natural peeling gel combines research principals with cell biology for an amazing product that reverses the visible appearance of each of the seven signs of aging. NuPeel instantly removes rough, dry keratin surface cells by naturally loosening the glue-like attachments of dead cells to leave behind soft, smooth, pliable skin. Perfect for legs, hands, elbows, feet and face and neck, too. This is a great product post-chemical peel, to aid in exfoliating dead cells.
